Education

Polytechnic University of the Philippines – Biñan Campus — Biñan, Laguna
Bachelor of Science in Information Technology — 2023–Present

Experience

Dewise Solutions Philippines — Mandaluyong City
Junior Software Engineer — December 2025 – April 2026

- Contributed to **3 applications**, provisioning cloud resources, deploying and monitoring services on Azure App Service, and supporting release pipelines through Azure DevOps.
- Developed backend features using **C# and ASP.NET Core**; assisted with Azure SQL Database schema design and query optimization.
- Translated Figma designs into responsive web interfaces using **React**

Start Up Network PH — Remote
Backend Developer — November 2025 – March 2026

- Designed the Business Requirements Document (BRD) and translated requirements into the website's backend architecture and Supabase database schema, designed to organize **360+ startup profiles and 500+ podcast episodes**.
- Developed the **API functions powering the startup directory**, supporting an organization with **18,000+ community members**.

AWS Cloud Club PUP Manila — Remote
Backend Developer — October 2025 – January 2026

- Built a **React** and **FastAPI** recruitment dashboard; automated **Supabase** ingestion for **200+ applicants across 7 departments**, with REST API filtering and Recharts analytics.

Projects

MemberFlow | Serverless membership & Digital ID platform — 2026
Built for the AWS Student Builder Group, PUP Biñan Campus

- Built with **React**, **TypeScript**, **Supabase,** and **AWS Lambda**; processed **300+ registrations** with multi-step forms, document uploads, and digital ID issuance.
- Implemented an email pipeline using **Supabase Edge Functions**, **AWS Lambda**, and **Gmail SMTP**, with queued retries and a scheduled **GitHub Actions worker**; sent **100+ emails with a 99%+ send success rate**.
- Replaced Google Forms and manual acceptance emails with a single approval workflow that sends acceptance emails and generates membership IDs; enforced access controls through JWT authentication and PostgreSQL Row-Level Security.

InterVueAI | Lead Developer 2026

- Built an AI interview MVP in 24 hours using **Supabase, Agora, and Grok AI** to automate simulated interviews and candidate feedback; placed in the **Top 10 out of 23 teams** at the AWS Cloud Club Philippines Innovation Cup, held in collaboration with Agora

Articulately 2026

- Built and deployed a **Flutter** and **Supabase** articulation-practice application with gamified tongue twisters, flashcards, and exercises; published an AWS Builder Center article that received **400 views**.

IntelliSched 2026

- Developed an academic scheduling system using **Laravel, Livewire, Alpine.js, and Tailwind CSS**, designed to support **40 professors, 20 departments, and 12 courses**.
- Replaced paper-based collection with authenticated forms for professors to submit availability and preferred subjects for each academic term.
- Automated schedule generation for subject offerings and sections, rejecting overlapping room, professor, and section schedules; integrated **Gemini AI** for explanations and suggestions.

Leadership & Activities

AWS Student Builder Group – PUP Biñan Biñan, Laguna

Founding Lead November 2025 – Present

- Founded and led a **300-member campus chapter** within AWS's global student program; earned AWS Cloud Clubs Gold Captain recognition.
- Organized **1 workshop and 1 seminar**; served as the main speaker for "Cloud 101: Introduction to AWS" at a chapter event attended by **100 participants**.

Technical Speaking

- Delivered "Getting Hands-on with AWS Console" at Asia Pacific Colleges, teaching console navigation and practical cost-saving techniques.
- Presented "Getting Started with AWS Serverless" for AWS Student Builder Group – USLT Chapter, demonstrating AWS Lambda and Amazon DynamoDB integration.

Skills & Certifications

Cloud Platforms: AWS Lambda, Amazon DynamoDB, Amazon S3, Amazon EC2, Azure App Service

CI/CD & Automation: GitHub Actions, Azure DevOps, Java Selenium

Programming: Python, C#, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Runtime: ASP.NET Core, FastAPI, React, Node.js, Flutter, Laravel

Languages: English, Filipino

Certifications

- Foundational C# with Microsoft – freeCodeCamp (Nov 2025)
- SQL Associate – DataCamp (Jun 2025)
